

I CLAIM:

1. A method for dart games, said method comprising:
providing a dart board, and
providing at least one reference line generating device to
5 generate at least one toe line for said dart board.
2. The method as claimed in claim 1, wherein said at least one
reference line generating device includes a light generating device
for generating said at least one toe line.
3. The method as claimed in claim 2 further comprising
10 providing a housing to receive said light generating device.
4. The method as claimed in claim 2 further comprising
providing a circuit board to support said light generating device.
5. The method as claimed in claim 3 further comprising
providing a casing in front of said housing to receive said light
15 generating device.
6. The method as claimed in claim 5 further comprising
providing and attaching a lens in said casing and disposing in front
of said light generating device.
7. The method as claimed in claim 6 further comprising
20 providing a passage in said casing to receive said lens therein.
8. The method as claimed in claim 1 further comprising
providing an attaching device for attaching said at least one
reference line generating device to said dart board.
9. The method as claimed in claim 8, wherein said attaching
25 device provides at least one arm having a first end attached to said
dart board, and a second end for supporting said at least one
reference line generating device.

10. The method as claimed in claim 9, wherein said attaching device provides an extension laterally extended from said first end of said at least one arm, and secured to said dart board with at least one fastener.

5 11. The method as claimed in claim 1 further comprising providing an attaching device for attaching said at least one reference line generating device to a supporting surface.

10 12. The method as claimed in claim 11, wherein said attaching device provides at least one arm having a first end attached to the supporting surface, and a second end for supporting said at least one reference line generating device.
